

Simple Responsive Navigation Menu

A clean, mobile-first navigation menu built with pure HTML5 and CSS3.

This template provides a simple, accessible, and responsive navigation layout without any JavaScript dependency.

Features

- Mobile-first design
- Fully responsive (mobile, tablet, desktop)
- Clean and semantic HTML5
- Modern CSS3 with Flexbox
- No JavaScript required
- Easy to customize
- Cross-browser compatible
- Well-structured and commented code

Technologies Used

- HTML5
- CSS3 (Flexbox)
- Mobile-first approach

File Structure

```
└── index.html
    └── assets/css/style.css
        └── documentation/
            └── index.html
```

Browser Compatibility

Tested and compatible with:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge
- Safari

How to Use

1. Download and extract the template files.
2. Open ‘index.html’ in your browser.
3. Customize the menu links and styles as needed.

Customization

- Edit menu links in ‘index.html’
- Change colors, spacing, and layout in ‘style.css’
- Adjust responsive behavior using media queries
